# Capital Markets Update

## Market Commentary

U.S. Treasuries rose last week, with the 10-year and 30-year yield increasing by 4 bps and 3 bps, respectively. Meanwhile, municipal yields slightly decreased, with the 10-year and 30-year yield falling 1 bp and 3 bps, respectively. Municipal bond funds saw over \$1.2 billion of inflows compared to nearly \$1.6 billion of inflows in the prior week, marking 13 consecutive weeks of positive fund flows. Last Friday's Supreme Court ruling regarding the President's imposed tariffs introduces additional market uncertainty, as the market sorts through its potential economic impact. Headline and core PCE inflation both came in slightly hotter than expected, lifting YoY headline inflation to its highest level since March 2024 and core inflation to its highest level since April 2024. Jobless claims will be released on Thursday, with the market expecting claims to rise back up at 215K in the latest week from an unexpectedly low 206K in the previous week. Currently, futures markets are pricing in approximately two rate cuts for 2026, with over a 90% probability of no change at the March 18 meeting.

# Fixed Income Analytics Group

## In-depth market analysis

Piper Sandler has a nationally recognized fixed income analytics team that provides comprehensive research into market trends and outlook.

### [PCE and Personal Income \(Inflation Firms as Savings Slide\)](#)

*“Nominal personal spending rose 4.7% YoY in December, outpacing the 4.3% YoY increase in personal income. This marked the eighth consecutive month in which spending growth exceeded income growth. As households leaned on savings to sustain consumption, the savings rate fell to its lowest level in more than three years. Income growth was supported by higher wages and compensation, though transfer payments provided a notable additional lift. Headline and core PCE inflation both came in slightly hotter than expected, lifting year over year headline inflation to its highest level since March 2024 and core inflation to its highest level since April 2024. Even so, both measures have remained largely rangebound over the past two years, with little evidence of runaway tariff-driven inflation. Services continue to account for most of the price pressure, though goods inflation played a larger role in pushing core higher in December. Despite the firmer prints, the broader inflation picture remains benign. The Fed’s preferred super core PCE measure, services excluding energy and housing, was unchanged in December. Market pricing barely moved after the release, with roughly 6% odds of a rate cut by the March 18 meeting and about 20% odds by April 29, suggesting the data did not materially alter the policy outlook.”*

### [Q4 2025 GDP Advance Estimate \(Shutdown Drag Masks Firmer Demand\)](#)

*“U.S. real GDP grew at a modest 1.4% annualized pace in Q4, supported by steady gains in consumer spending and business investment. The headline was held back by a sharp drop in government spending tied to the federal shutdown, which the BEA estimated shaved 1.1 percentage points off growth, the largest quarterly hit since 1994. Nevertheless, the report capped a solid year with the economy expanding 2.3% in 2025 after a Q1 contraction driven by a pre-tariff surge in imports. Looking through the shutdown distortion, underlying momentum was firmer than the headline suggests. Excluding the one-off drag, growth would have been closer to 2.5% to close out 2025. Consistent with that, real final sales, which exclude the more volatile trade and inventory components, rose 2.4%, only slightly below the 2.7% average of the past two years, signaling a sturdier domestic demand backdrop even with the government drag. More importantly, the government shock also sets up potential payback in Q1. On inflation, the core PCE price index rose 2.7% annualized, a touch above the 2.6% consensus but below the prior quarter’s 2.9%. Overall, the print supports the view that inflation is cooling gradually and remains contained.”*

### [Durable Goods Orders \(Aircraft Drag Masks Broad Strength\)](#)

*“U.S. durable goods orders fell 1.4% month over month in December, giving back part of November’s 5.4% surge. The headline decline overstates weakness, since orders excluding transportation rose for an eighth straight month and increased a little more than 5% year over year, the fastest pace since October 2022. The setback was largely concentrated in commercial aircraft, which pulled the overall figure into negative territory. Outside of aircraft, bookings were broadly higher, including gains in communications equipment, computers, metals and machinery, and motor vehicles. Business investment measures remained constructive. Non-defense capital goods orders excluding aircraft rose for a sixth consecutive month, the longest streak since March 2022, suggesting firms are still investing despite uncertainty and an unclear path to lower rates. Core capital goods shipments, which feed into GDP, also came in far above expectations, pointing to a stronger Q4 2025 contribution from equipment spending. Still, the outlook is not one way, as the Capex Intentions Index has fallen below 50, signaling a more cautious tone that often aligns with slower business investment ahead.”*

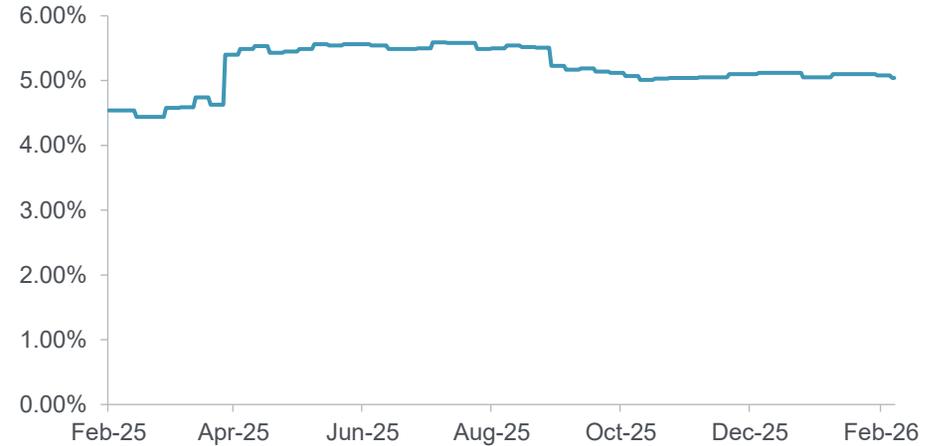

# Rate Movements Last 12 Months

Bond Buyer Revenue Bond Index (BBRBI) shows the average yield on a basket of 25 revenue bonds with 30-year maturities and an average rating equivalent to Moody's "A1" and S&P's "A+."

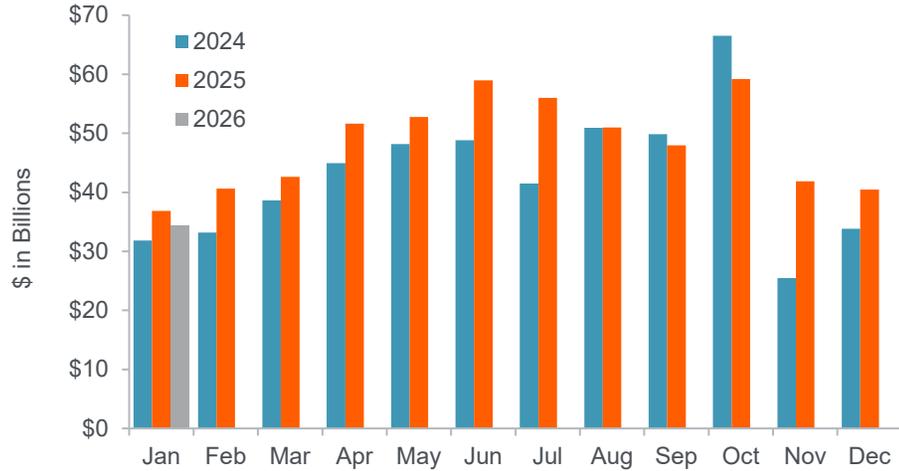

Bloomberg's BVAL AAA Callable Curve (Muni) is the yield curve of the highest-rated ("AAA" GO) municipal bonds.

SIFMA rate is a weekly short-term index comprised of tax-exempt variable rate bonds which serves as a benchmark floating rate.

Secured Overnight Financing Rate (SOFR) is a benchmark rate at which banks charge each other for short-term loans. SOFR is a replacement for LIBOR.
